Summary

Digital Product Designer with 2+ years across product, UI, and marketing design, focused on design systems and end-to-end UX for SaaS, enterprise, and e-commerce platforms. Owns the system side end to end: tokens, master components, accessibility, and developer handoff. Works closely with engineering and founders to turn loose briefs into patterns that ship.

Experience

Associate Product Designer, BigOhTech

October 2024 - Present

- Turned repeat website work into a section library of heroes, features, testimonials, timelines, and pricing blocks, each with multiple variants, so new sites are assembled rather than redesigned. Now powers **3 live SaaS products**, with launch time down from 3 months to under 1
- Designed and launched the company website, delivering a **40%** lift in conversion rate and **65%** growth in organic traffic within 3 months
- Redesigned DigiLawyer's product detail and listing pages, restructuring hierarchy, filtering, and the path to purchase, delivering **3x traffic and 2x clicks** on conversion CTAs
- Designed and tested the AI assistant layer for Costimizer, a cloud cost dashboard, running **35+ user sessions** that showed a 4-minute average session length and 58-second time to first action
- Produced interactive Figma prototypes to test concepts and secure stakeholder buy-in ahead of build
- Built accessibility into component specs, working to WCAG contrast and keyboard criteria

UX Design Intern, Maxlence Consulting

January 2024 - July 2024, Gurugram, India

- Redesigned the marketing website through iterative user testing, lifting conversion rate by **33%**
- Ran **25+ user interviews** and turned the findings into personas and a clearer, more accessible interface

System Design Intern, Delhi Metro Rail Corporation (DMRC)

September 2023 - November 2023, Delhi, India

- Designed a passenger feedback system for station and in-transit use, approved by DMRC for full production rollout
- Worked with Metro officials through the full design-to-handoff cycle, shaping the system around operational constraints so it could be sustained after launch

Education

Bachelor of Design, Interaction Design

JK Lakshmipat University, Jaipur

2020 - 2024

Skills

- Design Systems and UI Architecture
- Design Tokens and Component Libraries
- System-Level UX for Data-Dense Products
- Interaction Design and Interactive Prototyping
- Accessibility (WCAG AA) and State Management
- User Research and Usability Testing
- Developer Handoff, Annotated Specs and Acceptance Criteria
- Agile Delivery and Engineering Collaboration

Tools

- Figma (Design Systems, Tokens, Prototypes, Specs)
- Material Design 3, Angular Material
- Claude Code
- Adobe Suite (supporting)
